

# IS 117

## Intro to Website Development

### Course Projects

Project Name	Project Description	Link
Online Marketing and Data Privacy	This assignment is for IS117-101 Fall 2020. This project is designed to teach us how our information is collected on the web. While sometimes that can benefit us, other times it's harmful. We'll cover some cases where that data is used and how you can choose to remain anonymous if you don't see benefit. Having a modern design and feel, this is best presented for the average internet user, and young adults in general.	<a href="#">Online Marketing and Data Privacy Project</a>
History and How the Internet Works	This assignment is for IS117-101 Fall 2020. This project is designed to be a large resource of information about the internet. It's a combination of two prior sites worth of information. This website will have major design improvements.	<a href="#">History and How the Internet Works Project</a>
